PREFACE

Article VIII of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) prescribes that each Party shall prepare periodic reports on its implementation of CITES and shall transmit to the Secretariat an annual report containing a summary of the number and types of permits and certificates granted, the states with which trade occurred, the numbers or quantities and types of specimens, names of species as included in Appendices I, II, and III, and, where applicable, the size and sex of the specimens in question. The Office of Management Authority (OMA) is responsible for producing the Annual Report for the United States.

COVER ILLUSTRATION

In Notification to the Parties No. 325 (dated November 19, 1984), the CITES Secretariat distributed the official CITES logo for use by the Parties.

I. HISTORY AND SCOPE OF CITES

Final development of CITES was concluded at a diplomatic conference, attended by 88 countries, in Washington, D.C., in March 1973. It responded to Recommendation No. 99.3 of the 1972 United Nations Stockholm Conference on the Human Environment, and it was the result of many years of preparatory work by the International Union for Conservation of Nature and Natural Resources (IUCN) in consultation with governments and other international organizations.

The aim of CITES is to establish worldwide controls over trade in certain species of endangered and threatened wildlife and plants in recognition of the fact that unrestricted commercial exploitation is one of the major threats to the survival of species. For this purpose, species are listed in one of three Appendices to CITES. Depending upon the degree of protection necessary, the export and import of live specimens, and of parts or derivatives, is either prohibited or subjected to uniform permitting requirements recognized by all member countries. Each country that is Party to CITES is to have one or more designated Management Authorities and Scientific Authorities in charge of administering the permitting system, in cooperation with their foreign counterparts.

The Swiss Government serves as depositary for CITES. In 1984, the Secretariat, formerly located within the IUCN, came under the administration of the Executive Director of the United Nations Environment Programme (UNEP). Representatives of the Parties meet every two years to review implementation of CITES and to revise CITES procedures and lists of protected species in the light of current information on conservation status and trade (Emonds, 1981).

II. HISTORY OF U.S. IMPLEMENTATION

CITES is implemented in the United States under the Endangered Species Act (ESA) of 1973, as amended. The U.S. Fish and Wildlife Service (USFWS) issued regulations on February 22, 1977, to put CITES into effect in this country on May 23, 1977. United States implementation of CITES and the establishment of the U.S. Management and Scientific Authorities is described in the 1975-1977 biennial report which accompanied the U.S. CITES Annual Report for 1977. Amendments to the Endangered Species Act in 1979, 1982, and 1988 resulted in several changes in CITES implementation in this country. Major changes included; the redesignation of the Scientific Authority responsibilities from the Endangered Species Scientific Authority (ESSA) to the Secretary of the Department of the Interior; the redefinition of the Secretary of the Interior's criteria for determining non-detriment under Article IV of CITES to the best available biological information derived from professionally accepted wildlife management practices; and the requirement of the Secretary of State, when the United States votes against including a species in Appendix I or II of CITES and does not enter a reservation on the species pursuant to paragraph (3) of Article XV of CITES, to submit to the House of Representatives and the Senate a report setting forth reasons why the reservation was not entered; an increase in the appropriation of funds to the Department of the Interior and the Department of Agriculture for CITES implementation in 1988-92; and the signing into law of the African Elephant Conservation Act.

III. U.S. ADMINISTRATION OF CITES

A. General

The USFWS currently issues the following types of permits and certificates for CITES specimens: Appendix I import permits, export permits and reexport certificates; Appendix I and Appendix II import certificates (only for introduction from the sea), Appendix II export permits and reexport certificates; Appendix III reexport certificates and certificates of origin; certificates of exemption for specimens that are bred in captivity, artificially propagated, or acquired before the provisions of CITES applied to them; and certificates of registration for scientific institutions engaging in the exchange, loan, or donation of certain specimens. All U.S. export permits and certificates of reexport must be presented to an authorized federal official at the U.S. port of export so that the shipments can be inspected and the accompanying CITES permits and certificates can be validated. These documents are valid only if they are signed, stamped, and dated by such an official. These validated permits or certificates are necessary to import the CITES listed items into the receiving Party country. No permits are required for (1) specimens that are personal or household effects and meet the requirements of Article VII, paragraph 3, of CITES, or (2) specimens in transit through the United States which qualify for the Article VII, paragraph 1, exemption. Pending changes, however, may eliminate the personal or household effects exemption for live specimens.

Certain species listed in Appendix II that are subject to a large volume of commercial trade have required special considerations. Article VI of CITES provides that a separate permit or certificate shall be required for each consignment of specimens. Article VI also provides that copies may be used in place of the original to the extent endorsed thereon. Prior to 1981, "multiple shipment" permits were issued to authorize exports of certain species under certain conditions, but they did not necessarily specify the number of specimens or their destination. The exporter was required to enter such information on a copy of the permit, and to present the completed copy to a designated agent of the USFWS, for animals, or to the Animal and Plant Health Inspection Service (APHIS), for plants, at a designated U.S. port of export. The agent inspected the shipment and signed and stamped the permit. It was a condition of all such permits that they were not valid unless completed, signed, and stamped prior to export. The agents sent copies of these complete permits to the Management Authority for monitoring and record keeping.

The issuing procedure for "multiple shipment" export permits for wildlife was revised in 1981 and two new procedures were established: Letter of Authorization (LOA) and Dial A Permit (DAP). The DAP system was phased out in early 1985. Presently, a specific export permit is issued for each shipment containing animals or animal products. The LOA system allows for speedy issuance by the U.S. Management Authority, provides the exporter with an original CITES permit/certificate, and simplifies procedures for multiple-shipment exporters. The LOA is not a permit, rather it is an authorization for the exporter to obtain a permit at the port of export upon presentation of proof of legal take or import. An exporter may elect to use this system; however, it is limited to the export or reexport of a limited

number of species. Presently, LOA's are issued for CITES Appendix II and III wildlife. No species covered by ESA are included, except for Alligator mississippiensis, which is covered under a special rule. LOA's frequently are used for the export of Appendix II fur pelts, hides, or products under the conditions that the specimens were legally taken from the wild in a State with a tagging program approved by the U.S. Management Authority and that the U.S. Scientific Authority has made a finding of nondetriment for the species for each specific taking season. The exporter must provide proof of legal import into the United States in order to be able to obtain a reexport certificate. A basic difference between this procedure and the normal one is that the actual permit or certificate will be issued at the port of export (after initial review by the U.S. Management Authority). "Multiple shipment" certificates are still issued for plant exports by the Office of Management Authority in Washington, D.C.

The USFWS has designated 10 ports of entry/exit for the importation, exportation, and reexportation of wildlife. These ports are: New York, New York; Miami, Florida; Chicago, Illinois; San Francisco and Los Angeles, California; New Orleans, Louisiana; Dallas/Ft. Worth, Texas; Seattle, Washington; Portland, Oregon; and Honolulu, Hawaii. Enforcement of CITES at these ports with respect to wildlife is accomplished primarily by agents and inspectors of the Division of Law Enforcement (LE) of the USFWS, with assistance from U.S. Customs and other federal agencies. Designation of ports of entry or exit for wildlife is necessary because of the relatively small number of agents and inspectors. By regulation, wildlife shipments may enter or leave the country only at these ports unless authorized by a special non-designated port permit or other authorized exception. Customs officers aid the USFWS at other ports by halting shipments of wildlife entering or leaving the country without authorization, while notifying appropriate USFWS officials of such action.

Enforcement of CITES with respect to plants is the responsibility of both the USFWS and APHIS of the U.S. Department of Agriculture. APHIS is responsible for the inspection and clearance of plant shipments entering and exiting the United States. Plants subject to CITES are limited to 15 designated ports: Nogales, Arizona; Los Angeles, San Diego, and San Francisco, California; Miami, Florida; Honolulu, Hawaii; New Orleans, Louisiana; Hoboken, New Jersey (Port of New York); Jamaica, New York; San Juan, Puerto Rico; Brownsville, El Paso, Houston, and Laredo, Texas; and Seattle, Washington. [Note: In the Code of Federal Regulations 50 CFR Part 24.12, the USFWS designates the 15 ports for plants regulated by CITES or the ESA. Ten additional ports are designated for shipments of (1) Orchidaceae, (2) American ginseng (Panax quinquefolius), and (3) plant shipments between Canada and the United States. Furthermore, in a final rule published on October 25, 1984, APHIS established enforcement regulations pertaining to the importation, exportation, or reexportation of terrestrial plants under CITES or the ESA (49 FR 42907-42918).]

When a shipment of wildlife or plant specimens subject to CITES enters the United States, the accompanying foreign export permit or reexport certificate, along with any corresponding import permit that might be required, is collected and cancelled. All shipments are also subject to physical inspection.

Penalties for violations of CITES are set by the ESA. When a violation is discovered, the matter is presented for either criminal or civil prosecution. Maximum penalties under the criminal provisions of the ESA are one year in prison or \$20,000 fine or both. The maximum monetary civil penalty is \$10,000. However, if criminal violations are serious enough to meet criteria covered by fine improvement provisions of U.S. law, maximum fines for CITES violations can be as much as \$100,000 for individuals and \$200,000 for corporations.

The USFWS, pursuant to statutory and regulatory authority, established general procedures to deal with wildlife imported in violation of CITES and other Federal wildlife laws. Specimens imported in violation of CITES are subject to seizure and forfeiture. At the conclusion of appropriate criminal or civil proceedings, seized specimens normally are forfeited to the government. Specimens which become the property of the government through forfeiture proceedings may be sold at public auction, with the exception of specimens where sale is prohibited by law or USFWS policy. Illegal specimens may also become the property of the government through abandonment. An item is abandoned when, after being advised that the import is illegal, the importer volunteers to abandon any legal claim of ownership to the property.

B. More Restrictive Domestic Legislation

Many species of wildlife and plants regulated by CITES are also regulated by other U.S. laws; for example the ESA, the Marine Mammal Protection Act (MMPA), the Migratory Bird Treaty Act (MBTA), the Eagle Protection Act, and the Lacey Act. Any proposed activity with a protected species will have to comply with requirements of all applicable laws. Penalties for violations can be quite severe; for instance, a CITES violation which is charged under the provisions of the Lacey Act may result in maximum penalties of up to a \$250,000 fine and five years in prison for an individual. The overlapping requirements of CITES and the ESA may lead to complications because approximately half of the species listed on the ESA also are listed on CITES. The ESA generally is much more restrictive. Under the ESA, only the following activities are permitted: scientific research, enhancement of propagation or survival of the species, certain types of exhibition, educational purposes, and special purposes consistent with the Act. In general, commercial trade in wild specimens of species protected by the ESA is prohibited. Many of the seizures made by the USFWS Division of Law Enforcement are for violations of the ESA by tourists and businessmen who purchase prohibited products overseas and return to the United States. Further information on the relevant U.S. laws and the species they protect can be obtained from the U.S. Management Authority.

C. Violations

CITES violations are tracked by the USFWS Division of Law Enforcement. Summary information for individuals that received fines, jail, or civil penalties for violations of CITES adjudicated in the United States during 1989 is as follows: There were 2,230 CITES violations. Criminal fines totalled \$137,875, while civil penalties came to \$138,362. Jail sentences totalling 9,860 days (27 years) were imposed, along with 15,458 days (42.3 years) of probation. In addition, 115,347 items valued at \$1,413,391 were forfeited or abandoned to the U.S. government as a result of CITES violations.

APHIS is responsible for clearing all shipments of CITES protected plants entering and exiting the United States. During the calendar year 1989 there were 3,106 shipments of CITES-protected plant species exported and 3,763 shipments of CITES-protected plant species imported; 295 of the shipments were seized by APHIS inspectors (284 assigned to plant rescue centers, 4 left at the port, and 7 returned to the country of export). Most of these violations were for attempted importations without the appropriate CITES documentation. The seized specimens and the countries involved are indicated in the tables.

D. Data Coding and Annual Report Production

Data for shipments of live plants and plant parts and derivatives were obtained directly from documents collected by APHIS officials at the time of importation/exportation/reexportation. Unless otherwise indicated by APHIS officials, the quantity listed on the document was considered to be the quantity actually shipped. Information on appendix number, type of specimen, and source was sometimes missing from shipments being imported into the United States. In addition, several shipments were identified only as containing "orchids" or "cacti." Although most of these shipments may have contained Appendix II specimens of whole, live plants of wild origin, if there was reasonable doubt about the appendix status or the source, they were recorded as "Unknown" (see Key to Abbreviations).

For U.S. CITES Annual Reports reporting 1977-1979 trade, plants were listed to the genus or family level. However, for 1980-1983, all plant shipments were reported to the species or variety level, if that information appeared on the document. This procedure was modified slightly for 1984-1989, when artificially propagated, Appendix II orchid hybrids were reported as "Orchidaceae hybrids."

Data for commercial shipments of live wildlife and wildlife parts and derivatives were obtained primarily from the USFWS Declaration for Importation or Exportation of Fish or Wildlife (Standard Form 3-177). These forms must be filed at the time of importation or exportation and must include (among other things) names of the U.S. and foreign dealers, actual number of items, type of specimen, scientific and common name of the species, and country of origin. Additional information also was obtained from the CITES documents and other documents (e.g., invoices) that accompanied the shipments. The Declaration form also may be filed for personal items that were seized.

This is the eleventh U.S. CITES Annual Report to be compiled using a computer and it is similar to previous reports with regard to coding procedures and report format. In order to facilitate data coding and subsequent analysis, the following procedures were followed. Understanding these procedures makes the 1989 Annual Report much more useful and more easily understood.

1. Scientific Name: The completeness and accuracy of scientific names on CITES permits and certificates varies greatly. In some cases, especially those involving plants, specimens are identified only to the family level, while in other cases, variety names are supplied. Scientific names were recorded as listed on the document, except for spelling corrections. Names were then reviewed to determine currently accepted synonyms as follows: for mammals, Honacki et al. (1982); for birds, Morony et al. (1975); for reptiles, Groombridge (1981);

and for plants, McMahan (1981), The Royal Horticultural Society (1981), and Willis (1973).

Unconfirmed scientific names are enclosed in quotation marks (''). Specimens without complete scientific names are recorded to the greatest level of specificity possible; usually family.

Previous U.S. Annual Reports reflected our efforts to accurately identify the species in trade. Since 1980, we have edited scientific names to reflect the currently accepted synonym, if different from the properly spelled name on the document. Beginning in 1983, however, plant names were edited for spelling, but only Appendix I plant names were edited for synonymy. (Individuals analyzing trade data from or to the United States should keep in mind that the scientific names listed on export documents are not necessarily those which finally appear in the CITES Annual Report.)

Genus names longer than 18 characters and species names longer than 18 characters were truncated in order to leave sufficient space for the remaining fields.

2. Appendix Number: Appendix numbers were obtained from accompanying documents or by consulting the CITES Appendices. When the number was missing, and the species could be either Appendix I or II, the number "0" was used to indicate that the correct Appendix number was unknown. This situation frequently arose for plants identified to the family level. The situation is somewhat different for wildlife, however, in that unidentified specimens were provisionally identified as pertaining to Appendix II without identifying the actual species.

3. Country of Origin, Reexport, and Import: Data for these three fields were sometimes either missing or incorrect. U.S. regulations have not always required that U.S. exporters provide information on Country of Import (destination) for certain CITES Certificates of Exception (unlike CITES permits), but this information was normally provided. In addition, Country of Origin was sometimes missing for specimens that had been reexported. Declared Country of Origin was coded, even if apparently wrong. The field was coded as "Unknown" when only the continent was given or when no data were provided, rather than trying to speculate as to country. Country names and codes generally followed International Organization for Standardization (ISO) guidelines.

4. Quantity and Units: Whenever possible, the quantity (number and unit) of specimens was coded as it appeared on the permit or certificate. However, certain items such as boxes, bags, bales, cartons, etc., could not be quantified, making coding and analysis difficult. The term "Shipment" was used as a default category, when more specific information on the unit of a shipment was not available.

5. Type of Specimen: A wide variety of terms were used to describe specimens and products, but these conform substantially with CITES Notification No. 205.

The term "Trophy" was used to denote specimens obtained by sport hunting and almost always applied to noncommercial shipments. Often only a portion of the animal was shipped, such as a head mount or tanned hide, but in this report we attempted to represent the minimum number of whole animals from which the products were obtained. In the case of the African elephant (*Loxodonta africana*), tusks were listed separately from trophies in order to quantify better the amount of ivory being traded.

6. Number of Shipments: Lack of information on quantity in the shipment sometimes was a problem. Records based on a document that did not list quantity were tabulated as one shipment for each distinct species and for each type of specimen identified in that document. For example, if a document contained one product of one species, that document was counted as one shipment. If a document contained two species, that document was considered as two shipments, one shipment for each of the two species in the document. If a document contained two distinct types of specimens from the same species, that document was counted as two shipments, one shipment for each of the two distinct products in that document. The number of shipments listed in tables 2 and 3 of this report therefore can be misleading (see Section III.C, for more information on the number of shipments).

7. Purpose of Transaction: Most shipments were for "Commercial" purposes. Exchanges of specimens between registered museums were coded as "Museum", while exchanges of specimens between all other registered scientific institutions were coded as "Scientific". Shipments of live primates were, in most cases, considered as "Commercial", even though eventually destined for scientific or medical research. Many "Personal" shipments, especially confiscated shipments, were reported, even though CITES documents may not have accompanied the specimens or have been required. Animal trophies (obtained by sport hunting and accompanied by CITES export permits) were considered "Noncommercial".

8. Source: Generally speaking, this information was based on the CITES document that accompanied the shipment. However, this information frequently was missing or unclear. Many shipments coded as "Unknown" probably were of "Wild" origin.

9. Class, Order, and Family: Taxonomic headings were included in order to assist users of this report who might be unfamiliar with scientific names. The sequence of Class, Order, and Family followed the arrangement of the Appendices. Within each Family, specimens were listed alphabetically by genus, and within each genus, alphabetically by species. Note that some variance occurred as a result of the internal sorting order used by the computer for nonalphabetic characters. Complete taxonomic headings were included for all Classes,

except plants, where Order was omitted. Plants were listed alphabetically by Family.

10. Status: The status/disposition of a shipment, as listed in this report was determined by plant and wildlife inspectors after a review of the documentation and the specimens. Note that occasionally a wildlife shipment with a status listing of "Seized" may have been initially seized and later (at some time after the printing of this report) cleared.

IV. SUMMARY OF TRADE

A. General

This report covers imports, exports, reexports, and introductions from the sea of species included in the CITES Appendices. It summarizes all such trade from January 1 through December 31, 1989, based on (1) export or reexport documents from other countries collected and cancelled by officers at U.S. ports of entry upon importation, and (2) documents issued by the U.S. Management Authority for import, export, reexport, or introduction from the sea, and cancelled or validated by such officers when the trade occurred. This report therefore indicates actual trade rather than the permits issued to authorize trade. Also, shipments made under exemptions for personal and household effects or for museum and herbarium specimens, although they do not require CITES permits, are noted in the "Purpose of Transaction" field. The report also summarizes foreign certificates for captive-bred wildlife and pre-CITES wildlife and plants.

B. Explanation of Tables

Table 1 summarizes the number of CITES permits and certificates granted by the U.S. Management Authority during 1989. The actual number of CITES permits and certificates issued was 4,954.

Table 2 summarizes imports of specimens and products into the United States during 1989, arranged by species (as in the CITES Appendices) and, within species, by country of origin. It includes Country of Origin, Appendix Number, Class, Order, Family, Species (scientific name of the specimen), Number (quantity being traded), Unit, Type of Specimen, Purpose of Transaction, Source, and Status. See the Key to Abbreviations for an explanation of the various terms used. Species are listed taxonomically, then alphabetically by Country of Origin, Country of Reexport, and Country of Import, and then alphabetically by Type of Specimen. "Country of Origin" means country where the plant or animal was taken from the wild or the country of natal origin of the species.

Table 3 summarizes exports and reexports from the United States during 1989 in the same manner as in Table 2.

Important Note regarding Table 2 and Table 3: Identical records, except for quantity, are summarized with the sum of the quantities in the quantity field (Quantity) and the number of combined records in the number of shipments field (#RCDS). This innovation enables us to shorten, as well as simplify this report. The raw data, which do not appear in this report, are still coded by

individual records (shipments). In a second innovation, all artificially propagated Appendix II orchid hybrids in trade were reported as "Orchidaceae hybrids", in accordance with Resolution Conf. 5.14 paragraph (g).

Table 4 sums up the total number of shipments of CITES specimens and products imported into and exported/reexported from the United States during 1989.

Table 5 summarizes, at the Order level for wildlife and at the Family level for plants, United States trade in CITES specimens and products during 1989.

C. Codes for the Names of Countries [Established by the International Organization for Standardization (ISO)]

AD - Andorra	CX - Christmas Island
AE - United Arab Emirates	CY - Cyprus
AF - Afghanistan	
AG - Antigua and Barbuda	DD - German Democratic Republic
AL - Albania	DE - Germany, Federal Republic of
AN - Netherlands Antilles	DJ - Djibouti
AO - Angola	DK - Denmark
AQ - Australian Antarctic Territory	DM - Dominica
AR - Argentina	DO - Dominican Republic
AS - American Samoa	DZ - Algeria
AT - Austria	
AU - Australia	EC - Ecuador
AW - Aruba	EG - Egypt
	EH - Western Sahara
BB - Barbados	ES - Spain
BD - Bangladesh	ET - Ethiopia
BE - Belgium	
BG - Bulgaria	FI - Finland
BH - Bahrain	FJ - Fiji
BI - Burundi	FK - Falkland Islands (Malvinas)
BJ - Benin	FO - Faeroe Islands
BM - Bermuda	FQ - French Southern and Antarctic Territories
BN - Brunei Darussalam	FR - France
BO - Bolivia	
BQ - British Antarctic Territory	GA - Gabon
BR - Brazil	GB - United Kingdom (includes England, Northern Ireland, Scotland, and Wales)
BS - Bahamas	GD - Grenada
BT - Bhutan	GF - French Guiana
BU - Burma	GH - Ghana
BV - Bouvet Island	GI - Gibraltar
BW - Botswana	GL - Greenland
BY - Byelorussian SSR	GM - Gambia
BZ - Belize	GN - Guinea
	GP - Guadeloupe
CA - Canada	GQ - Equatorial Guinea
CC - Cocos (Keeling) Islands	GR - Greece
CF - Central African Republic	GT - Guatemala
CG - Congo	GU - Guam
CH - Switzerland	GW - Guinea-Bissau
CI - Cote d'Ivoire	GY - Guyana
CK - Cook Island	
CL - Chile	HK - Hong Kong
CM - Cameroon, United Republic of	HM - Heard and McDonald Islands
CN - China	HN - Honduras
CO - Colombia	HT - Haiti
CR - Costa Rica	HU - Hungary
CS - Czechoslovakia	HV - Burkina Faso
CT - Canton and Enderbury Island	
CU - Cuba	
CV - Cape Verde	

(C. Codes for the Names of Countries - continued)

ID - Indonesia	NA - Namibia
IE - Ireland	NC - New Caledonia
IL - Israel	NE - Niger
IN - India	NF - Norfolk Island
IO - British Indian Ocean Territory	NG - Nigeria
IQ - Iraq	NI - Nicaragua
IR - Iran, Islamic Republic of	NL - Netherlands
IS - Iceland	NO - Norway
IT - Italy	NP - Nepal
	NQ - Dronning Maud Land
JM - Jamaica	NR - Nauru
JO - Jordan	NT - Neutral Zone
JP - Japan	NU - Niue
JT - Johnston Island	NZ - New Zealand
KE - Kenya	OM - Oman
KH - Kampuchea, Democratic	
KI - Kiribati	PA - Panama
KM - Comoros	PC - Pacific Islands, Trust Territory of
KN - St. Kitts and Nevis	PE - Peru
KP - Korea, Democratic People's Republic of	PF - French Polynesia
KR - Korea, Republic of	PG - Papua New Guinea
KW - Kuwait	PH - Philippines
KY - Cayman Islands	PK - Pakistan
	PL - Poland
LA - Lao People's Democratic Republic	PM - St.-Pierre and Miquelon
LB - Lebanon	PN - Pitcairn Islands
LC - Saint Lucia	PR - Puerto Rico
LI - Liechtenstein	PT - Portugal
LK - Sri Lanka	PU - United States Miscellaneous Pacific Islands
LR - Liberia	PY - Paraguay
LS - Lesotho	
LU - Luxembourg	QA - Qatar
LY - Libyan Arab Jamahiriya	
MA - Morocco	RE - Reunion
MC - Monaco	RO - Romania
MG - Madagascar	RW - Rwanda
MI - Midway Islands	
ML - Mali	
MN - Mongolia	SA - Saudi Arabia
MO - Macau	SB - Solomon Islands
MQ - Martinique	SC - Seychelles
MR - Mauritania	SD - Sudan
MS - Montserrat	SE - Sweden
MT - Malta	SG - Singapore
MU - Mauritius	SH - St. Helena
MV - Maldives	SJ - Svalbard and Jan Hayen Islands
MW - Malawi	SL - Sierra Leone
MX - Mexico	SM - San Marino
MY - Malaysia	SN - Senegal
MZ - Mozambique	SO - Somalia
	SR - Suriname

(C. Codes for Names of Countries - continued)

ST - Sao Tome and Principe
SU - Union of Soviet Socialist
Republics
SV - El Salvador
SY - Syrian Arab Republic
SZ - Swaziland

TC - Turks and Caicos Islands
TD - Chad
TG - Togo
TH - Thailand
TK - Tokelau
TN - Tunisia
TO - Tonga
TP - East Timor
TR - Turkey
TT - Trinidad and Tobago
TV - Tuvalu
TW - Taiwan (Province of China)
TZ - Tanzania, United Republic of

UA - Ukranian SSR
UG - Uganda
US - United States of America
UY - Uruguay

VA - Vatican City State (Holy See)
VC - Saint Vincent and the Grenadines
VE - Venezuela
VG - British Virgin Islands
VI - United States Virgin Islands
VN - Viet Nam
VU - Vanuatu

WF - Wallis and Futuna Islands
WI - "West Indies" and
Unidentified Caribbean
Islands (not per ISO)
WK - Wake Islands
WS - Samoa

XX - Unknown

YD - Yemen, Democratic
YE - Yemen
YU - Yugoslavia

ZA - South Africa
ZM - Zambia
ZR - Zaire
ZW - Zimbabwe

D. Codes Used in Column Headings

A = Appendix Number
 C = Class
 CI = Country of Import
 CO = Country of Origin
 CR = Country of Reexport
 FF = Family
 GENUS = Genus
 OO = Order
 P = Purpose of Transaction
 QUANTITY = Number of Items
 S = Source
 SPECIES = Species
 ST = Status
 TS = Type of Specimen
 UNIT = Unit
 #RCDS = Number of Shipments

E. Appendix Number (A)

0 = Appendix Number Unknown
 1 = Appendix I
 2 = Appendix II
 3 = Appendix III

F. Unit (UNIT)

CENT = Centimeters Long
 CMPT = Community Pot
 CUFT = Cubic Feet
 CUMT = Cubic Meters
 ENVL = Envelope
 FEET = Feet
 GRAM = Gram
 INCH = Inch
 ITEM = Item
 KILO = Kilogram

METE = Meter
 MTON = Metric Ton
 OUNC = Ounce
 POUN = Pound
 SHIP = Shipment
 SQDC = Square Decimeter
 SQFT = Square Feet
 SQMT = Square Meter
 VIAL = Vial (small bottle or flask)

G. Type of Specimen (TS)

BIOL = Biological Specimen	PKEY = Ivory Piano Key
BPRD = Bone Product	PSKN = Pieces of Skin
BULB = Plant Bulb	RCOR = Raw Coral
CARC = Carcass (nontrophy, nonstuffed, whole dead animal)	RIVR = Raw Ivory
CLAW = Claw	ROOT = Plant Root
CUTT = Plant Cutting/Division	RUGS = Animal Hide Rug
DEAD = Dead Specimen (live animal that died during shipment)	SCSP = Scientific Specimen
EGGS = Eggs	SDLG = Seedling
FEAT = Feather	SEED = Seed
FEET = Feet	SHEL = Shell
FIBR = Plant Fiber (stuffing)	SHOE = Shoe/Boot or Substantial Parts thereof
FLWR = Flower	SKIN = Skin/Hide (raw or partially processed skin/hide)
FPOT = Flower Pot	SKUL = Skull (not used for trophy or scientific shipments)
FPPL = Fur Piece Plate	SMPD = Small Leather Product
GRMT = Garment	SPRD = Shell Product
HBAG = Handbag	STUF = Stuffed Animal (souvenir)
HPRD = Horn Product	TETH = Teeth
ICAR = Ivory Carving	TRIM = Garment or Shoe Trim
IJWL = Ivory Jewelry	TROP = Animal Trophy (personal use)
JWLY = Jewelry (other than ivory)	TUSK = Ivory Tusk
LGPD = Large Leather Product	UNSP = Unspecified
LIVE = Live Animal or Plant	WBND = Watch Band/Strap
MEAT = Meat	WOOD = Wood or Wood Product
MEDC = Pharmaceuticals, Aphrodisiacs	
MERI = Mericlone or Meristem Tissue	
OILS = Oils	

H. Purpose of Transaction (P)

A = Return of Confiscated Specimens by the Management Authority
C = Commercial
M = Museum Exchange (between registered museums)
N = Noncommercial (may be used in place of M, P, S, T, or Z)
P = Personal (usually without CITES documents)
S = Scientific Research
T = Temporary (in transit; for example, exhibition or circuses)
Z = Zoological Exchange

I. Source (S)

A = Artificially Propagated (plants)*
C = Captive Born (animals)**
O = Other
P = Pre-CITES
U = Unspecified/Unknown
W = Wild
Z = Zoo

J. Status (ST)

CL = Cleared
SZ = Seized
AB = Abandoned
RE = Reexport

* Does not necessarily conform to the CITES resolution Conf. 2.12 definition of "artificially propagated."

** Does not necessarily conform to the CITES resolution Conf. 2.12 definition of "bred in captivity."
